

We had great fun at sports day

Kirktonholme @ Fairhill August/September 2010 Newsletter

Sunshine Room

This month the children have been learning about rockets and space. They have made what they think the solar system looks like with paper mache balloons and a great big rocket for the display wall.

The children have also been learning how to plant and grow fruit and vegetable!! Watch out Alan Tichmarsh. They planted raddish, lettuce, sweetcorn, tomatoes and runner beans. The care of them is down to the children, which they have been doing very well with. They are now looking forward to watching all the plants grow and hopefully eating them for snacks

Busy bee room

The children have started learning about colour and paint through a splash painting which is on display in the busy been room.

This month the children will continue to develop their sensory skills by looking at more colours and working with lots of messy mediums such as gloop, sand and paint. This will help children understand the how different colours are made, feel different textures and experience the smells of various foods, such as herbs sweet substances and savories etc.

Nursery news

We had a very successful sports day in which the children participated with great enthusiasm and they all took pleasure in receiving their medals, It was also wonderful to see the participation of enthusiastic parents, with congratulations to all those who joined in. Graduation was also a great success with all enjoying the celebrations of the day.

Nicky Bray is standing in as Manager, while Lesley-Anne is on sick leave. We have also appointed a new manager, Margaret Rodger, she has a great wealth of experience in all areas of the nursery business, we will look forward to welcoming her to Kirktonholme @ Fairhill very soon.
